Work to be Performed:

Removal of Trash and Debris: Weekly

Contractor shall remove and properly dispose of all clippings, trimmings or cuttings as a result of

their work in accordance with local and state regulations. Remove all debris generated by the work from the property at the end of the service day. **On – site dumpsters and trash bins are not to be used to dispose of debris related to this project.** When using a blower, it is required that landscapers blow debris away from the units when performing services.

Turf: Weekly

Turf to be mowed and edged **once a week** or as weather conditions allow. However, if weather conditions require a modification to these dates due to warmer, cooler, or wetter weather, the contractor shall make the appropriate adjustment to the frequency of mowing, with notification to the property manager.

Landscaper shall review areas in need of reseeding and perform the reseeding as needed. (Price shall be included in the monthly contract amount)

Should weather conditions interfere with weekly landscaping schedule, then landscaper shall provide landscaping services to each location the next available day within that week. Contractor shall immediately notify Senior Regional Communities Manager or their designee of the next available date.

Chemicals are not to be used to edge grass. Landscapers utilizing edgers, rotary trimmers or “weed whackers” must not cause any damage to the exterior of buildings, including stucco or paint; as this will be charged to landscaper as damages.

Fertilization will be performed **four times per year**. A balanced fertilizer (16-6-8 w/iron) shall be used **three times** and a high nitrogen formulation (22-0-0) in winter shall be utilized. Broadleaf and pre-emergent weed control once a year. Turf to be aerated as needed to relieve compaction. Replace of mulch as needed to cover any areas that experience erosion.

Note: In reference to fertilization of turf areas, please coordinate with Regional Communities Manager and/or Maintenance Supervisor **prior** to scheduling this service to verify areas to be fertilized.

Gopher and/or Ground Squirrel control is to be included. Treatment shall be on a monthly cycle and ongoing when evidence is observed.

A California Chemical Applicator License is required to apply Roundup (glyphosate), pre-emergents, pesticides, gopher bait (strychnine) and snail bait (metaldehyde). Chemical operations must be covered by liability insurance. If you will be using these products, your staff will be required to possess the appropriate applicator license and have appropriate liability insurance coverage.

Shrub: Weekly

To be kept neat and clean and in a healthy growing condition at all times. Shrubs are to be pruned monthly for aesthetics or as directed by Reliant and fertilized two times per year with a balanced fertilizer. All chemical applications to control pests are included. The landscaper shall be fully responsible for any replacement of shrubs, which die within 3 months of planting, which shall be at no cost to owner. Also, shrubs should be maintained to ensure that they do not block windows, impede walkways; touch buildings, cooling systems and electric/gas utility meters.

Ground Cover: Weekly

To be trimmed neatly, weed free, and kept in a healthy growing condition at all times. Edges to be trimmed straight, height to be controlled as necessary or as directed by owner. Ground cover to be contained in its original design intent and away from any existing shrubs. Ground cover shall be fertilized twice a year with a balanced fertilizer. The landscaper shall be fully responsible for any replacement of ground cover, which dies within 3 months of planting. No cost to owner to be billed.

Contractor must trim trees, on an ongoing basis; so that they do not touch the roof, or fascia of buildings, regardless of the height of the tree.

Irrigation-Ongoing:

Any repairs caused by contractor's neglect shall be remedied at no cost to Reliant. All sprinkler head and lateral line repairs are included in proposal. Any major repairs for Region/Service Area, repair of irrigation mainline, repair of remote control valves, and repair of automatic controller will be reported to Reliant and completed only after approval. Automatic water system to be tested weekly to insure proper coverage and operation. Programming of automatic water control system is the responsibility of the landscaper, which should reflect

changes of climate and plant's needs. Landscaper shall set timer(s) to comply with current and future municipal water use restrictions. For example – irrigation only permitted on certain days of week according to odd/even addresses. Other municipalities mandate no watering at all on certain days.

Additionally, contractor is responsible for making any seasonal adjustments to the automatic watering systems to maintain a healthy growth and water conservation.
